

PROCESS DEVELOPMENT ENGINEER

TOM

"I'm fascinated in using science and engineering to understand how ingredients and processes work together to create great tasting, healthier snack foods. Yum yum!"

**TOP
TIP!**

"The food industry is the biggest employer in the UK and is in need of people in STEM roles!"

EDUCATION

GCSE's including Science, Maths, History & Business

Master's Degree in Chemical Engineering

A Levels in Chemistry, Physics, Biology & Maths

EXPERIENCE

8 years at PepsiCo in Process Development for healthier snack foods

3 years at United Biscuits in Ingredients Development for biscuits and cakes

ROLE AT

PEPSICO

 In the Process Team we improve, adapt and invent technologies or equipment to make healthier and sustainable snacks foods.

 I use my understanding of STEM subjects to do research, experimental trials and engineering design work on projects around the world
